1. **Permit Requirement**—No person, firm or organization, shall excavate in any street highway or sidewalk in the City of Kingston without obtaining a permit from the Department of Public Works. Applicant must apply at least 48 hours prior to commencement of work.
2. **Commencement of Work**—The Superintendent of Public Works reserves the right to deny the commencement of work to be performed on any street that has been resurfaced or reconstructed within 5 years prior to the date of the application. The Superintendent may require full surface restoration as per his specifications.
3. **Trees**—When performing any excavation or repair, no tree in any street or other public place may be removed, cut or trimmed without first obtaining permission from the Office of Planning in conjunction with the Department of Public Works.
4. **Emergency Work**—Emergency work necessary after hours, non-business days, or legal holidays, to correct a situation endangering public safety or interruption of utility service may not begin until DPW has been notified via on call service. Emergency fee may apply as well as possible overtime reimbursement for DPW personnel. Permit must be filed by 10:00am of the next business day.
5. **Dig Safely**—No work may commence in any area until clearance has been provided by the Dig Safely provisions.
6. **Unattended Openings**—All unattended street openings or excavations, including intersections, shall be plated and secured in place, except as otherwise approved by the Superintendent of Public Works.
7. **Detours/Safety Devices**—Barricades, signs, lights and other approved safety devices shall be displayed at excavation/street opening in accordance with the NYS or Federal Manual of Uniform Traffic Control Devices and approved detours shall be established.
8. **Approved Site**—In no case shall permitted site have a greater area of surface removed or perform work in another location other than that specified on the original application without first obtaining permission from the Superintendent of Public Works or his designee.
9. **Excavated Material**— All paving materials must be removed with the least possible loss of ground. The excavated material must be placed where it will cause the least possible inconvenience to the public or impact to utilities. Sheeting, shoring and or bracing shall be used when the excavation or opening is five feet or more in depth. In case of slips or slides of the excavation, the same shall be trimmed to solid earth and the top surface put back to the limit of the same before backfilling may begin.
10. **OSHA**—All excavations must meet OSHA requirements and standards for excavation and trenching safety.
11. **Back Fill**—All openings shall be back filled and temporarily resurfaced on or before the time fixed in the permit. Such temporary resurfacing shall be maintained by the person to whom the permit is issued until such time as a permanent resurfacing can be completed. Subject to weather and product availability only.
12. **Cut Away Requirements**—All materials used for backfill and street restoration should be consistent with cutaway drawing provided on page 4 of this application. Material shall be in good condition and comparable or better to those which have been removed.
13. **Notification**—Applicants are required to notify the City of Kingston Police and Fire Departments and all emergency services prior to the commencement of work.
14. **Attend to Site**—Applicants shall be responsible for work site up to 18 months from completion of work..
15. **Closing Additional Streets**—The Mayor, Superintendent of Public Works, Chief of Police or other safety officials may recommend the closing of additional streets, avenues or high ways for any portion of the permitted work. It will be the responsibility of the applicant to follow all guidelines for traffic control on these additional streets.
16. **Insurance**—Prior to commencement of work, the applicant shall submit to the DPW office, proof of worker compensation and disability insurance, liability insurance and a good & sufficient bond of indemnity with surety in the sum of \$15,000 (fifteen thousand) indemnifying the city against any and all claims, demands, actions or causes of action in anyway connected with or growing out of the making of such cut, trench, repair or excavation. Detailed information regarding insurance requirements available upon request.
17. **Winter Excavation**—No excavation other than an emergency on any city street, avenue or highway between November 15th and March 15th will be permitted without explicit approval of the superintendent or his designee.
18. **Inspection**—Must call DPW office for inspection prior to closing excavation site.
19. **Protected Streets**—No street opening shall be allowed, except for emergency work without the permission of the Superintendent of Public Works in a street for a period of five years from the completion of street reconstruction, projects or resurfacing. All provisions for restoration shall apply to these streets. Applicants are responsible for contacting the DPW to determine whether a street has been or is scheduled to be rebuilt under a street reconstruction or capital project.
