- II. Status of project and upcoming public meeting – 10 minutes
- III. Review of Potential Projects for DRI funding – 60 minutes
- IV. Next steps
- V. Set date for next meeting

Description of Types of DRI Funding Categories

Public Improvements

Public Improvements include the following types of activities: infrastructure projects such as broadband and other communications connectivity, water supply, wastewater, storm water, green infrastructure, streetscape improvements, transportation, recreational trails, parking, signage, open space improvements, and access and trail connections.

New Development and Rehabilitation of Existing Structures

New development and rehabilitation of existing structures include the following types of activities: development or redevelopment of, real property including pre-development or pre-construction activities, new construction, infill, development, demolition in support of new development, and environmental review.

Revolving Loan and Grant Template

Revolving loan funds and grants include the following activities: loan funds and grants for façade improvements, minor residential improvements, sidewalk improvements, public art and public realm improvements, physical improvement to existing and/or vacant commercial space, e.g. tenant fit-up, and other similar activities. Projects that are significant, such as new construction, should not be proposed for a revolving loan and instead should be proposed as their own individual project.

Branding and Marketing Template

Branding and marketing include the following types of activities: branding and marketing of the downtown to the public, including residents, investors, developers, tourists, and visitors.
